SUB8A

Compact active subwoofer
100V line input

Presentation:

The SUB cabinet is a universally useable solution for installations seeking for a discrete but compact and effective subwoofer. Its bass reflex design is engineered to be as compact as possible while giving the maximum performance in terms of sound quality and bass response to a PA installation. The SUB8 is loaded with an 8" ferrite type magnet woofer capable of delivering 200W rms and peak power of 400W. The active version is equipped with a 150W Class D mono amplifier unit featuring an electronic "auto power on" that allows to trigger the mains supply once detected signal on the input. This SUB series is the perfect partner to work with MOOSE PURE series (passive) acting as a supplement in PA installations to complete the existing sound with a deep and extended low frequency response. The compact dimensions allows close placement to any wall or corner.

Features:

- Bass reflex 8" subwoofer
- Active version
- 8" LF European transducer
- 8 Ohm low impedance input
- 100V Line transformer input
- Compact = permit inobstrusive placement
- Powder coated custom perforated steel grille
- Supplied with wall mount/ceiling brackets
